Invitation Letter

In 2012, the Solar System started on the ascending part of its orbit around the center of the Milky Way Galaxy, gradually approaching it. In that particular moment, during the parade of planets, the structure of the space-time continuum of our world was changed so that the impact of the Fundamental Laws of the Universe on our lives and the planet became very much stronger, instantaneous in its action and irreversible, as we entered the Age of Aquarius.

9 years in, it finally became obvious to everyone on Earth that we live in the Time of Change. The Covid pandemic, as well as various natural disasters such as fires, floods, storms, etc. are the signs of the Earth telling us that humanity is on a somewhat wrong path of its evolution and has to take a totally different route before it destroyed itself and/or the planet in wars and everlasting binge of consumerism.

Russian space scientists (Russian cosmists) had forever thought of what is the right way for the humankind to go to be able to evolve in harmony with itself and the world around. To date, having absorbed their knowledge and experience, we, modern Russian space experts and researchers, members of the Association of researchers of the unknown phenomena of nature, cosmos and human abilities Ecology of the Unknown, which is the most recognized in Russia non-governmental non-profit organization dealing with the study of various so-called anomalous phenomena, including UFOs (UAPs), see two paths that humanity might take in the current global alarming situation:

- 1) Leave everything unchanged and hope for a miracle that someday there will come some powerful force to cure us from the diseases, purify our oceans from harmful contaminants and poisons that we have poured into them, uplift our morality, eliminate all the corruption and poverty from our society, stop wars and deliver us from our ego... While the Big Tech companies try to redesign the human to make him look like a bio-robot with a predictable set of algorithms, seemingly easy to control and remodel...
- 2) Wake ourselves up to the situation we are in today of standing on the verge of a stall to a self-destruction process and completely, purposefully, consistently change. Change as our mindset and the attitude to the world around in general, as well as the conditions we live in, that is change our ways of living until the now growing entropy of our world is eliminated. Simultaneously with the process of change put everything back in order: clear the planet and the near-Earth space from trash and waste, purify the oceans, recover the biosphere, revise our scientific paradigm – build a completely new human world based on the laws of Ethics. These laws are universal; we call them the Ethics of the Cosmos. The problem with humanity now is that it does not follow these laws, while it should and must.

We believe that the second path is faster, easier and more appropriate.

That is why to assist all Humankind in a new commitment to become a moral, peaceful, ethical, global civilization, moving toward fulfilling its Cosmic purpose as the only force on Earth, in the Solar System, and in the Galaxy itself that can accomplish what we humans must do we established an international social movement for the promotion of peaceful existence in outer space, **The Ethics of the Cosmos**. We invite everyone to join this movement and participate in it to the extent one is able and wants to.

There are three documents, which explain in every detail why and for what purpose The Ethics of the Cosmos was established, what are its goal and objectives, and what are the Fundamental Laws of the Universe, referred to as the Ethics of the Cosmos. The three documents are:

- the Preamble,
- the Declaration and
- the Conception of the Living Universe.

Find them on our website – www.ethicsofthecosmos.com – and get familiar with them.

What we want from the future members and/or participants of the movement to do at the initial stage of the spread of The Ethics of the Cosmos is as simple as that:

- spread the information about the movement and share the Conception of the Living Universe with everyone who you think would be interested and able to comprehend it;
- subscribe to The Ethics of the Cosmos YouTube channel and its social media accounts to stay tuned to the updates and upcoming events;
- check out the website of The Ethics of the Cosmos and share it with someone who you think would love to know about the movement;
- do what you personally can in order to manifest your best human qualities and emotions: love, gratitude, integrity, care, tenderness, sincerity, daring, honesty, dignity, valor, reliability, commitment, sense of humor, etc. Because what you radiate is shaping your reality, what you focus on – that thing is going to occur and grow;
- donate what you will and can to support the movement financially.

Contact us if you have any questions and/or want to join The Ethics of the Cosmos social movement for the promotion of peaceful existence in Outer Space!

Chief Coordinator
The Ethics of the Cosmos,
General Director
Association Ecology of the Unknown
